-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. In response to the final rejection action from 3/27/2006, the applicant has submitted a Pre-Appeal Brief Request for Review, filed on 7/26/2006.

Withdrawal of Finality

2. Applicant's arguments in the Pre-Appeal Brief Request for Review, filed 7/26/2006, with respect to claims 1, and 15-18 have been fully considered and are persuasive. The final rejection of claims 1-4, 7, 9-10, 13-19, 21, and 23 has been withdrawn, and a new Office Action follows, next.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 15 is rejected under 35 U.S.C. 101 because it does not fall within one of the four categories patentable subject matter of 35 U.S.C § 101 (process, machine, manufacture, or composition of matter). The recited claim presents an Abstract Idea (a computer program product), which is a subject matter that is not a practical application or use of an idea, a law of nature or a natural phenomenon, and so is not patentable. See, e.g., *Rubber-Tip Pencil Co. v. Howard*, 87 U.S. (20 Wall.) 498, 507 (1874) ("idea of itself is not patentable, but a new device by which it may be made practically useful is"); *Mackay Radio & Telegraph Co. v. Radio Corp. of America*, 306 U.S. 86, 94, 40 USPQ 199, 202 (1939) ("While a scientific truth, or the

Art Unit: 2626

mathematical expression of it, is not patentable invention, a novel and useful structure created with the aid of knowledge of scientific truth may be.”); Warmerdam, 33 F.3d at 1360, 31 USPQ2d at 1759 (“steps of 'locating' a medial axis, and 'creating' a bubble hierarchy . . . describe nothing more than the manipulation of basic mathematical constructs, the paradigmatic 'abstract idea'”). See *Le Roy v. Tatham*, 55 U.S. (14 How.) 156, 175 (1852) (“A principle, in the abstract, is a fundamental truth; an original cause; a motive; these cannot be patented, as no one can claim in either of them an exclusive right.”); *Funk Bros. Seed Co. v. Kalo Inoculant Co.*, 333 U.S. 127, 132, 76 USPQ 280, 282 (1948) (combination of six species of bacteria held to be nonstatutory subject matter).

Accordingly, the subject matter of claim 21 is held to be nonstatutory subject matter.

Allowable Subject Matter

4. **Claim 15** would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 101, set forth in this Office action.

Claims 1-4, 7, 9-10, 13-14, 16-19, 21, and 23 are allowed over prior art. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1, and 15-17 recite transitioning among states using a voice browser comprising the steps of receiving a script at the voice browser from a web server utilizing a network; the script is executed utilizing the voice browser; a plurality of states is then automatically tracked during the execution of the script utilizing the voice browser; upon receiving a request from a user during the execution of the script to transition to a previous state, the voice browser

automatically transitions to the previous state of the script; and wherein a number of previous states a user is capable of transitioning to is customizable.

The closest prior art is Valco et al. (U.S 6, 826, 264) in view of Ito et al. (2002/0010586), who teach system for transitioning among states using a voice browser comprising the steps of receiving a script at the voice browser from a web server utilizing a network; the script is executed utilizing the voice browser; a plurality of states is then automatically tracked during the execution of the script utilizing the voice browser; upon receiving a request from a user during the execution of the script to transition to a previous state, the voice browser automatically transitions to the previous state of the script, and Surace et al. (U.S 6, 334, 103) who teach a voice user interface that allows the user to transit from a main state to other application states.

Valco in view Ito and Surace, do not teach wherein a number of previous states a user is capable of transitioning to is customizable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
